

WARPSimLab Frequently Asked Questions

Educational Financial Simulation Software

WARPSimLab (the Wealth Analysis & Retirement Planning Simulator Lab) is an educational personal finance simulator designed to help users explore long-term financial scenarios, budgets, assets, and portfolio dynamics in a structured simulation environment.

This FAQ provides practical information about how the software is positioned, how it runs, and how its results should be interpreted.

What is WARPSimLab?

WARPSimLab is an educational personal finance simulator designed to help users explore long-term financial scenarios, budgets, assets, and portfolio dynamics.

Does WARPSimLab provide financial advice?

No. WARPSimLab should not be used for financial, investment, tax, or legal advice. It is an educational tool.

Should I use WARPSimLab to make financial decisions?

WARPSimLab is intended for educational exploration only. It should not be used as the sole basis for financial, investment, tax, or retirement decisions.

Users should consult qualified financial, tax, or legal professionals before making decisions related to their personal finances.

Are the simulation results predictions of the future?

No. The results generated by WARPSimLab are hypothetical simulations based on user inputs and model assumptions.

They are not predictions, guarantees, or forecasts of actual future financial outcomes.

Do the simulations include every real-world factor?

No. The models used in WARPSimLab are simplified representations of financial systems and may omit important real-world factors.

Does WARPSimLab run in a browser?

No. The simulator runs locally on the user's computer rather than in a web browser.

It does not intentionally transmit user-entered financial data to the website, the developer, or any external service.

What platforms are supported?

Windows is currently available.

macOS and Linux are planned for later.

Does the website collect application data?

No application data is intentionally transmitted from the simulator to the website or anywhere else on the internet.

Does the website collect download statistics?

When the application is downloaded, a simple anonymous download counter may be incremented to measure general usage of the site.

No personal information or application data is collected.

Do you sell or share my data?

No personal or financial data is collected or transmitted by the simulator. Because no user data is collected, there is no data to sell or share.

Is WARPSimLab free?

WARPSimLab is free.

Is WARPSimLab open source?

The WARPSimLab program is released under an MIT License. See LICENSE.txt in the download package for the full license terms.

The source code is not currently distributed with the application.

May I have the source code?

The source code is not available.

Where should new users start?

New users should start with the Tutorials tab in the application.

Where can I find the full legal terms?

The complete legal disclaimer and terms of use are available on the WARPSimLab Legal page.

Important: WARPSimLab is provided for educational and informational purposes only. For the complete legal disclaimer and terms of use, please review the WARPSimLab Legal page.
